ABOUT US:

Asha Ventures Private Ltd is system integration solution provider for Coldchain & Air-conditioning industry. AVPL undertakes turnkey contracts including System integration and automation and Energy Efficiency study for HVACR Industry.

We offer complete solutions for refrigeration & HVAC needs for Horticulture, Floriculture, Ice cream & Dairy Industry, Sea Food & Frozen Food, Food processing units, pharmaceutical industries, Hospitality sectors & QSR etc.

Our factory is located near Mumbai and we are Sales and Service offices in 5 Location Mumbai, Pune, Akola, Nagpur, Raipur. In addition to this thru our service associates we can provide services across India.

OUR SERVICES :

Our design and build capabilities are supported by a team of professional engineers. We have an knowledge , experience of product, processes , purpose , resources and construction techniques that enable every project design to meet customer budgeting, scheduling and operating objectives.

We offer complete solutions for

- Pack houses for Fruits and Vegetables.
- Large Cold Storage & Mini Cold Room
- IQF, Blast Freezer and Blast Chillers
- Pre cooler & Hydro coolers
- Small Raw Milk Chillers & Incubation Chambers.
- Quarantine Solutions for Fruits and Vegetables.
- Industrial Air-conditioning & Process HVAC System
- Process Chillers
- Automation
- Air Coolers and Green House Solutions.

What Can Faster and More-Powerful Pre-coolers Do for Your Business?

Faster Precooling means
Less Water Loss Prior to Fully-Cooled
More Net Weight to Pack Out and Sell
Longer Shelf Life
Less Claims and Credits

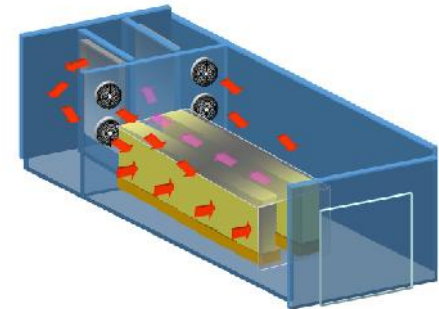

Faster Precooling
More Throughput per Day
Less Labor Cost
Less Electrical Cost.

A Chain is as Strong as Its Weakest Link, and Pre-coolers are the most important link in Postharvest / Cold Chain.

When the water evaporates, you can't put it back again.

Cherries, for example, lose 1 day of shelf life for every 1 hour delay to 40F! That shelf life loss is a direct result of water loss through late and long precooling. How would you like to have 1/2% or 1% more product to sell?

* Please contact for Customize and Mobile Pre-coolers

Pack-House Solutions

Our design and build capabilities are supported by a team of professional engineers. We have an knowledge , experience of product, processes , purpose , resources and construction techniques that enable every produce requirement to meet customer budgeting, scheduling and operating objectives.

Our Design Pack House Solutions consist of

- Pre-Coolers & Cold Room
- Pack House
- Hot Water Quarantine Solutions for Fruits and Vegetables.
- Hydro Coolers
- Dock Solutions
- High Care Packing & Process Area.

We offer solutions for Baby Corn, Pomegranate Arils, Vegetables, Banana and other FnV Produce.
